I have a copy of the DiskInternals and Easeus partition recovery tools that can't find the missing partition table/data. DiskInternals shows me all partitions but doesn't show missing ones. I can't reproduce the issue as it can't start DiskInternals or Easeus and I can't start Windows or Linux to check for a missing partition. Has anyone experienced this issue?EDIT: I have enabled the following devices in

Windows: 1 - SATA 1 1 - SATA 2
2-IDE 2-IDE 3-IDE 3-IDE 4-SATA I
did the following to test it: Start
Easeus. Select "Test" Select "Test /
Select"
