- Created by an application fan - Fast opening programs help you work - Use to recover password and disable restriction Microsoft PowerPoint presentation files can be a real treat, filled with special effects, transitions, and other gimmicks intended to aid sending a message or illustrate a concept. However, password-protected or restricted PowerPoint files become more or less of a troublesome demeanor when users forget the password... There are literally hundreds of apps addressing this issue, but Passper for PowerPoint promises to present a simplified solution. Or does it? Minimalist interface that potentially stands in users' way when working with it Right off the bat, users will notice that the app's developers had simplicity in mind when creating the interface. Two, big, discernable features will allow one to either recover the lost password or remove any pending restrictions on the file. However, upon selecting either of the two options, there is no drag-and-drop support for adding the file. Nor does the program support batch processing. This could be disturbing for those who demand increased processing capabilities and prefer an efficient workflow. Step-by-step recovery process, which can be aided by providing hints or password details Provided that users have managed to input a PowerPoint file for recovery, a step-by-step wizard will accompany them in the process of retrieving that lost password. There are three decryption methods available and selecting one will then lead to a succession of user-input-required steps.

Useful as these steps may be, users could be bothered from having to provide password details such as the potential length, prefixes or suffixes, letter casing and so on and so forth. Maybe one doesn't remember any details regarding the password, so all these additional steps only make the whole recovery process less efficient. Fair PowerPoint file password recovery software, but with a very meandering recovery wizard This application addresses users who find themselves in the situation of having lost the passwords for their PowerPoint documents. Featuring a multi-step recovery wizard, the app could require too many details for the retrieval process, thus putting-off users right from the start. Sometimes, transferring files from a PC to a device can be a tricky task. In this day and age of technology, all modern phones and tablets have Wi-Fi capabilities. Transferring files from your PC to a mobile device is not only a faster method, but it also brings its own set of advantages. However, there is still a problem. The Wi-Fi connection is known to be finicky, so it is difficult to establish a consistent internet connection. If you are new to Wi-Fi connection, it may seem like a daunting task to consistently set-up your device to communicate with the local router. Fortunately, there are tools that can make this process much easier. Wifi Connect allows you to connect to your

#### What's New in the Passper For PowerPoint?

Passper for PowerPoint is a highly convenient (and sometimes, rather complicated) way to overcome any tricky PowerPoint file password-related problems. It performs the intended job well, but could become a bit cumbersome if users are not aware of how the app functions. What does Passper for PowerPoint Review... Layered automatically loads PDFs in the background Ever wanted a nice looking application that could load up a PDF automatically when one was to open the app. Well, Layered does just that. There are a number of customization options that allow users to configure a diverse set of PDF saving options. PDF files can be processed by the app using either of the batch saving options. The second option allows users to save multiple PDFs at a time, as the app creates a new file for each document that is added. The app adds the password protection files with ease and then, users can select an optional password and the desired encrypting option. Layered comes with a functional tutorial that covers all its features to simplify the workflow. A simple and easy-to-use interface for extra saving options Layered comes with a number of useful PDF saving options. Users can create PDFs with a watermark, with customizable shadows or with handwritten notes. When creating PDFs, users can also select the default PDF watermark, a watermark with an additional file, a pdf signature, or a certificate. These three last options have to be added during the saving process. The app offers plenty of customization options that allow users to add a customizable watermark, customize the layout, set custom metadata, as well as create custom signatures. Decent

PDF generator, but with limited customization options The PDF file generator comes with basic customization features, limited to adding metadata, and a toolbar that allows users to create freehand drawings. The app saves PDFs in its default folder or in an alternate one. Some may find Layered to be a bit complicated, as it offers a diverse set of PDF saving options, but no drastic drawbacks, and that is what makes it an easy-to-use PDF generator. One of the main problems with this app is that, while it offers a pre-configured PDF generator, it doesn't allow users to generate certificates for use with a third-party security system or PDFs with annotations that can be recognized by third-party software. Additional features that are only available on a paid version The free version of Layered only includes two PDF saving options.
