A FANTASY ADVENTURE, ONLY IN THE WEST OF JOHOR. Elden Ring is a fantasy action RPG developed by the newly established King Art, the developer of Nitro +, based in Bandung, Indonesia. Elden Ring is the second major release after the highly successful Star Wars: Knights of the Old Republic™ developed by BioWare, a developer known for creating award-winning AAA titles. A new fantasy setting where the

Player character is the newly 'empowered' Old King, awakening a new destiny. Rise, Tarnished, and be guided by grace to brandish the power of the Elden Ring and become an Elden Lord in the Lands Between. "I think Dragon Quest is a wonderful game. It's fun and it makes you want to play again and again," says Elden Ring's Lead Game Designer for CROSSFIRE, Dogen Harada. "However, you really don't have much freedom to set up the game. You can't really customize a lot of things. You can't just set everything up like you like and be able to have a RPG that allows you to play from start to finish. That's what I wanted to make with the 'Dragon Quest meets Knights of the Old Revolver.' That is the driving force to make Elden Ring. "The challenge was how to make something with an ambitious plan. I wanted to make a large world like in Final Fantasy, but at the same time the story and the game design were important. I wanted to make sure the world is enjoyable and it works in a way that it can be played from the start. We spent a lot of

time on the original plan and we made sure that when you start you don't have to grind for things. You can just play right away.

After that, we needed to work out the mechanisms of the game and the balance between the set-up story and the actual play. That was the hardest part of the development.” About Game Features 1. An

Epic Drama that unfolds in the Lands Between A multilayered story full of exciting situations is told in fragments. An epic drama that unfolds in the Lands Between between the Iron City and the Kingdom of Melita. The lands between the World of Iron and the World of Amber. The player's objectives are numerous, and depending on the choices made by the player, a variety of outcomes are possible for both the original story and other

by Aqua (CGM) Original ████████████████████ The game, "look at more reports, look at more reports", become so serious. —"What is the object of this game?", I thought. It seems the development staff of this game is there to make entertainment for the players. I knew that this game is not an action game such as "Monster Hunter." I think it is different from "Monster Hunter" in terms of the action in the game is not limited to hunters and monsters, but the action of the players are supported. The monsters such as Bokuto and Nikon, the enemy monsters such as Grosjean and Rouger, the

traps, set a way for the players to compete. I think this game is different from "Monster Hunter" in terms of the action. The battle plays in the position of "dungeon adventure game."
