Roblox is an online game platform and game creation system developed by Roblox Corporation that allows users to program games and play games created by other users. Created by David Baszucki and Erik Cassel in 2004 and released in 2006, the platform hosts user-created games of multiple genres coded in the programming language Lua. For most of Roblox's history, it was relatively small, both as a platform and a company. Roblox began to grow rapidly in the second half of the 2010s, and this growth has been accelerated by the COVID-19 pandemic. Roblox is free to play, with in-game purchases available through a virtual currency called Robux. As of August 2020, Roblox had over 164 million monthly active users, including more than half of all American children under 16. Although Roblox has received generally positive reviews from critics, it has faced criticism for its moderation, microtransactions, and exploitative practices directed toward children.

How to play Minecraft? Step by step Minecraft is a video game developed by Mojang and published by Microsoft Studios. It was released on Microsoft Windows, OS X and Linux on the 9th of November 2009, and on Xbox 360 and PlayStation 3 on the 17th of June 2010. It is the first game to make more than a billion dollars in sales. Minecraft has been installed by more than 100 million people and it is the best selling video game of all time. The game is set in a three-dimensional world filled with many types of blocky terrain. Once installed, the game loads in a world filled with blocks of different types. The player can place the blocks with the mouse or by typing, and they can also destroy blocks to create an infinite number of different scenarios. The game's content is generated procedurally, which results in a seamless world. The player can explore the game's world in any direction, but new maps are generated only when the world is loaded, so exploration is limited.
