Treatment of symptomatic olfactory bulbs in frontotemporal lobar degeneration: A randomized controlled trial. The aim of this study was to test the effectiveness of olfactory bulb stimulation in patients with frontotemporal lobar degeneration (FTLD). Seventy-six FTLD patients with olfactory deficits (dysosmia, olfactory agnosia, or hyposmia) were included in a randomized, double-blind, sham-controlled trial. Patients underwent four sessions of transcranial magnetic stimulation over left olfactory bulb during a period of 2 weeks. A total of 36 patients received active treatment and 40 placebo. Secondary outcomes included cognitive and motor tasks (primary outcome measure) and depression (Edinburgh Depression Scale, score above 17; BDI-II, score above 16). The two groups showed a slight improvement in most of the secondary outcome measures. Statistical analyses revealed significant differences favoring active treatment for the following: cognitive tasks (VFT, TMT-B, VF backward and visuo-spatial function, Stroop test, digit span backwards), depression (BDI-II), and motor function (9-HPT). No differences were found between the two groups for the primary outcome measures. The results suggest that olfactory bulb stimulation is a useful complement in the management of FTLD. Our study provides the first evidence that brain stimulation is effective in FTLD.// //

What's New In Student Progress?

HandyMockup is a word processor, graphics editor and presentation creator designed to give students and teachers the power to create and deliver a variety of communication products, all at once. Create word-processed documents, pictures, and presentations with a professional level of quality. How Does It Work? It's hard to deny that HandyMockup has a much more elegant design than many of the other software applications out there. The interface might be a little overwhelming and confusing at first, but the sheer amount of power you're getting for a lower price tag is really attractive. Just imagine the time you can save once you've managed to get the hang of the program. When it comes to features, you're getting a lot for your money. As far as word-processed documents go, you can insert/delete/position images, make text and font changes, change page backgrounds and insert formatting for tables and lists. With regards to graphics, you can also work with pictures, make adjustments to their size, alter the blending mode, add text to them, apply color and even change the typeface. Finally, with regards to presentations, you can create dynamic or static presentations, add pictures, videos, data, create hyperlinks and even embed media players. HandyMockup can be downloaded for free. What's New? Over the past year, HandyMockup has added new features, including a new user interface, a new Adobe tool, and the option to easily export PowerPoint and Keynote files. There's also a new Advanced Masking tool, which allows users to use tools to create graphics and images. As a teacher or tutor, it's very difficult at times to keep track of how well your students are evolving. Each individual follows a unique path of development, which is why it can't hurt to keep things up to date with the help of Student Progress, an application that was created in order to help any teacher looking to have a better idea about how each particular student is evolving in a certain group. How does the app work? There's not really a lot of magic going on with this application. In fact, the foundation for this program will always be an Excel file that acts as a data source. What the app does is help organize and simplify the procedure of creating a comprehensive document containing all the student information. As far as the interface is concerned, there really isn't much to complain about. Still, there's nothing to praise either. Everything is within reach which in the end works to the advantage of any teacher. The interface does the job Even though it might not be the most aesthetically pleasing, Student Progress does sport an easy-to-access

System Requirements For Student Progress:

* Windows: 7/8/8.1/10 (64-bit) * Mac OS X 10.7.5 or higher (64-bit)
