A simple-to-use file explorer that facilitates basic file management options. How to get rid of "Cannot remove \Software\Microsoft\Internet Explorer\restart\Windows.old" message? I'm pretty new to the Microsoft world and after reading a lot about Windows operating system I finally decided to use Windows 7 and make the jump. Now I'm having problems with my computer I'm trying to remove the message that says "Cannot remove \Software\Microsoft\Internet Explorer\restart\Windows.old" I have tried: - Deleting the folder with the exclamation mark - Deleting the.exe file and the.dll file - Deleting the Registry key associated with this message (I'm not really sure how to do that). Any help would be appreciated! A: Just delete "C:\Users\YOUR_USERNAME\AppData\Local\Temp\Restart.old" and reboot. His family asked that no memorial service be held. Mattox's wife, Alma, said he died at their home in Midland. Mattox first made his mark in West Texas politics as a young man by supporting a state Supreme Court judge who was black. He would spend decades molding his own political views by listening to a variety of speakers, ranging from those who supported state-sanctioned prayer at school events to those who opposed it. "He was a perfect host," recalled former District Judge Tom Phillips, a Perry campaign consultant. "He'd get out the magnolia blooms and the watermelon." Though Mattox lived and worked in Midland for most of his life, he was a native of Lubbock. He was raised in a Methodist
