In our world, performance matters. Somewhere between Snapchat's popularity and its loneliness lies the "Snapchat Effect." And while there's definitely a lot of backlash from the "Snapchat Is The New Porn" crowd, Snapchat did something disruptive with the camera that didn't exist before. It gave its users a way to take photos and video and apply filters in seconds. And so everyone else just wants to take something easy next to people who already have billions of dollars in the bank and are ultimately judged by how many people view their posts. The natural progression from Snapchat to Instagram is pretty obvious. These are very popular platforms that changed the design of social media and, in turn, shifted the way all eyes are pointed at the internet. I'm not here to make a case that Snap knows what Snapchat was, just that Instagram is going to feel as big as it is right now. Because Snap's core feature is off the table, there's going to be a lot to build on for Instagram. Snap's most successful move was creating an enticing social network, not a revolutionary photo app. That's why I thought it was good that Snap took a moment to reflect on its old marketing slogan on Thursday. Snapchat's new slogan is, "It's the best camera on earth." I think it's a pretty accurate statement for what they're trying to do next. With less investment than Twitter, Snapchat could actually be poised to be a very dominant social network.

Next, choose the colors you'd like to use for either the header or the background, or leave it blank if you'd like to use the same color as the foreground to which you're applying the effects or the top bar. Here, you can apply blending options and effects to almost every part of your image. With the blending effects in Adobe Photoshop (such as color, gradient, and picture) you can easily change the meaning, tone, or aesthetics of your image e3d0a04c9c
